(a) both arms at their verified refit minima, linear in ℓ
flat ΛCDM control
CR, crossing arm
Planck TT bandpowers
$\mathcal{D}_\ell = \ell(\ell+1)C_\ell/2\pi$ [μK^2]
whitened residual [σ]
ℓ
(b) logarithmic from ℓ = 2: the floor and the peaks in one frame
minimum at ℓ = 4,
not at the quadrupole
no floor (flat transfer)
the discrete floor, ℓ = 2–8
observed low-ℓ band
same residuals as (a), on the log axis
